## **BOBRICK ANNOUNCES ADA OPERATION-COMPLIANT, PUSH-OPERATED NAPKIN/TAMPON VENDOR SERIES.**

October 6, 2010 – North Hollywood, CA – Bobrick Washroom Equipment, Inc. has introduced three series of Napkin/Tampon Vendors with ADA Operation-compliant, pushbutton mechanisms that operate with less than 5 lbs of force without tight grasping, pinching or twisting of the wrist, and all new jam-resistant engineering.

Jam-resistant coin mechanisms feature single coin slots for quarters only. Incorrect coins (1¢, 5¢, 10¢) and quarters used when a patron changes her mind and presses coin return button, drop into the product tray, by-passing the mechanism. Additional features include easy access product tray which eliminates reaching through door opening into the cabinet. Refill indicators signal empty product channels and block coin slots. Positive-feed product channels without weights provide easy refilling with capacity for 30 tampons and 20 napkins. Two tumbler door locks are keyed like other Bobrick restroom accessories, and coin box has separate lock and key for management access. The vendors are fabricated of 60%-70% recycled stainless steel.

Design-integrated series include Classic, TrimLine and Contura, each available with either 25¢ or 50¢ coinage, in recessed, semi-recessed or surface-mounted installation configurations.
